Ref T E Schescke ltr to L C Rock, TES-003-91, Closure of Unit 63, Building 371, Room 3420, July 29, 1991

Solid Waste Management Unit (SWMU) 212, located in Building 371, Room 3420, is a solid waste drum storage area for transuranic (TRU) mixed wastes. The Interagency Agreement (IAG) requires closure of this unit under OU 15 Inside Building Closures (IBC) by August 1992. During IAG negotiations, a request to transfer TRU mixed wastes from SWMU 212 to a proposed storage area in Building 776 was deemed necessary in order to support the Plutonium Recovery Modification Project (PRMP). Due to the reorganization of the PRMP program, it is no longer necessary to transfer waste from this unit. In addition, this unit is being incorporated into the RCRA Part B Permit Application for TRU mixed wastes.

Withdrawal of the closure for Site 63, Unit 212 from the IAG is requested. A draft letter to the regulators for that purpose is enclosed.

If you have any questions or require additional information, please contact R T Ogg at extension 7079 or L C Rock at extension 5964 of Remediation Programs
